# ONLY lifestyle

ONLY fulfills the dream of a smart home in a simple and intuitive way. An attractive design, the simplicity of use and the absolute customisation offer an incomparable lifestyle.

Welcome to ONLY.

**ONLY** SMART HOME

# *Innovation from Portugal to the World.*

## Made in Portugal.

ONLY is a brand of Enancer Electrónica with its headquarters in Braga, Portugal and is part of Fehst Group, a family business at a global scale.

ONLY means smart buildings automation, easy to install and to set up, with complete features for the control of lights, window shutters, air conditioning, security and audio.

Our R&D team is constantly anticipating new design, efficiency and user experience trends and at the same time all solutions are strictly controlled in terms of quality, thus ensuring an outstanding performance.

With thousands of ONLY products installed worldwide, we keep reinventing our technology to bring you the best comfort and energy efficiency.

# Our technology. Your rules.

A minimalist aesthetics, exclusive components and excellence in engineering merge into a technological solution full of impressive individual features and details.

ONLY is much more than a latest generation technology. It is smart home completely dedicated to you.

Total privacy and endless possibilities of customisation bring to life your true personal choice. ONLY is a manifest of sophistication for unique and exclusive homes.

## The core thinker

D-WSX1 server is a must in your ONLY Smart Home, as it will improve your daily experience. A silent controller at your ONLY Smart Home that works seamless with myONLY app. The more you use it, the more it'll keep a firm grip on energy efficiency.

And that's why you shouldn't be surprised if myONLY app notifies you about your video doorbell, climatization, or your shutters. D-WSX1 server will seek all the time to grant you comfort and safety without disregarding your energy bill.

## Power and Intuition

myONLY app is your assistant to your ONLY Smart Home and you may use it with your smartphone, tablet or computer.

So intuitive as intense, it will learn from you and will assist you on how to get the best out of your smart home system, giving tips for your comfort, safety and energy efficiency. It is the visible side of D-WSX1 server.

### How it works

The D-WSX1 server is a dedicated embedded processor. It interfaces the ONLY Smart Home system to many others systems such as sensors, video doorbell, smart locks, video cams, weather stations, energy meters, etc., and includes powerful data processing for automatic events setup and management that will make your home routines much easier, such as heating/cooling, light, shades, irrigation, etc. It connects automatically to your ONLY Smart Home system and collects all the information for control. With myONLY app, you setup events, scenes and favourite behaviour.

After defining your favourite comfort and efficiency settings, D-WSX1 server will strive to provide you with the best comfort and security while always maintaining power consumption as low as possible. With TLS and password protected login, your data is always safe and out of the cloud.

### Where to install it

With its sleek design, D-WSX1 server will look great along with any other technological gadget you may have in your living room. Or if you choose the electric switchboard version, just keep it in some technical area. It only needs power and LAN access.

### Compatibility

ONLY Smart Home works daily for the support of new communication protocols. Besides the native ONLY CAN BUS, it supports \*Z-Wave, MODBUS and IP third party devices.

\*Third party compatibility is updated periodically. Please check [www.only-smartbuildings.com/myonly/](http://www.only-smartbuildings.com/myonly/)

*Let's broaden  
our minds.*

*Joker*

## What you can't see

### Actuators, Output devices

These are the devices that control light, shades, climatization appliances and play your favourite tunes. The in-wall versions are installed in the standard wall switch box making it the ideal solution for retrofitting or building renovation. The wall keypads are snapped into these in-wall devices. You may choose any keypad model independently of the in-wall device. For a centralized solution, the electric switchboard versions are the best option.

### D-WSX1 server

You decide if D-WSX1 server is visible or not! Table top version, design coherent with all ONLY Smart Home product line, or the technical version, hidden at the electric switchboard.

### Flexibility

The wall keypad models are totally independent of the device where they are installed. A 9 touch sensors keypad may be installed over a 2 output actuator, and its keys may be used

to control any other ONLY Smart Home system actuator. Choose the wall keypad panels that best suites your control needs and interior design requirements and install it wherever you want in the house.

Total flexibility to define the actuator needs independently of the wall keypad models that later on will be installed over each actuator.

### Communication BUS

All automation systems need to communicate. The ONLY Smart Home communication infrastructure is based on CAN technology and its reliability.

ONLY CAN BUS is installed by adding an extra electrical wire, with the same gauge, providing a highly reliable solution without the extra costs of the dedicated communication solutions. Although invisible, ONLY CAN BUS is one more reason that makes ONLY Smart Home so reliable.

Amazing  
from all  
perspectives.

## All you can see

### Wall keypads

Minimal design, with the essential and a subtle beep sound and soft led light for a sensorial feedback or with extra features, equipped with OLED display for an immediate access to setup. Flexibility for finishing colours and coatings, materials - wood, stone, glass, metal - or hidden behind the finishing surface of the walls. Countless icon options for a total customisation. For large projects the logo might also be customised.

### myONLY app

Intuitive, simple and so complex in the functionalities it offers. With myONLY app all the power of automation is in your hands. An exciting and innovative tech experience, oriented to your comfort, safety and energetic efficiency. Immediate control, scenes and smart events setup, video doorbell, smart lock, etc. All visible including information about the energy efficiency and estimation of your next energy bill... You choose what you want to see.

# Freedom of Choice

## Only Click

### Timeless Pleasure

Timeless pleasure for the “click” reaction enthusiasts.

## Only Touch

### Smooth Control

The soft touch, control without commotion.

## Only Wave

### Advanced Technology

No click, no touch, just wave up or down, left or right... Like many things in life, all you need to do is waving.

### About the ONLY panels

#### Models OC

Basic ONLY wall keypad with traditional click reaction buttons.  
4 press buttons.  
Custom icons, colours, including metal coating.

#### Models OT

Standard ONLY touch panel with visual and acoustic feedback. This is the “most wanted” ONLY keypad mostly due to its minimal design.  
1 to 9 soft touch buttons.  
Custom icons, colours. No metal coatings.

#### Models OW

New paradigm on how to interact with a wall “keypad”.  
No buttons, it’s the way you move your hand in front of the panel that triggers an individual action.  
Custom icons, colours. No metal coatings.

Find out more:  
[www.only-smartbuildings.com/wallpanels/](http://www.only-smartbuildings.com/wallpanels/)

#### What does an ONLY panel do?

To each button or gesture you may define one of the following actions or triggers:  
ON, OFF, TOGGLE, TIMED ON, TIMED OFF, SCENE

#### Where to install it

On the wall, over any actuator installed on the standard switch wall box (actuators model C) exception for audio and climatization that require an OLED display panel.

The ONLY CLICK models are also available on table top wireless version.

*Music in the  
soul can be heard  
by the universe.*

Lao Tzu

## Composed to relax you

### Audio

The power of music is immense. High quality sound in every room and at every moment. Waking up with music while curtains open, listening to the latest news on the radio while you prepare to start the day, or activating a scenario of background music while softening the light in the room. Set it up once and enjoy it whenever you want.

**Endless possibilities, always.**

#### ONLY FM

##### Always playing

Your favorite FM radio channels.

#### ONLY Bluetooth

##### Always moving

Your smartphone paired to play your tunes.

#### ONLY AUX

##### Always connected

Permanent connection to your sound library or any other audio source.

Find out more:  
[www.only-smartbuildings.com/audio/](http://www.only-smartbuildings.com/audio/)

#### About the ONLY AUDIO

The ONLY AUDIO, depending on the options, includes 6 memories FM radio, bluetooth, auxiliar inputs, 1 or 2 audio zones and audio amplifier.

#### Where it is installed

There are 3 versions of the ONLY AUDIO systems: Wall (standard wall box), electric switchboard (DIN rail

mounting standard) and in-ceiling box.

#### How to set it up

Directly on the wall ONLY CLICK, ONLY TOUCH, ONLY WAVE or OLED display panels and by using myONLY app.

# Designed to enlighten you

## Lighting

One touch to turn on, turn off or adjust the lights according to your mood. An infinite universe of options. We take your personal environment further when all natural and artificial lighting adjusts to each moment of your day, whether it is a dinner with friends or a home cinema evening.

The perfect environment with just one touch.

Find out more:  
[www.only-smartbuildings.com/lighting/](http://www.only-smartbuildings.com/lighting/)

### About ONLY LIGHT

ONLY LIGHT is available in many different versions to match today's lighting technology. Available modules allow the control ON/OFF, direct and indirect dimming, of lamps and LED stripes, monochrome or RGB colours.

For the natural light control, ONLY LIGHT open/close modules provide a precise control for shades and blackouts.

### Where it is installed

There are 2 versions of the ONLY LIGHT systems: Wall (standard wall box) and Electric Switchboard (DIN rail mounting standard).

### How to set it up

Directly on the wall ONLY CLICK, ONLY TOUCH, ONLY WAVE or OLED display panels and using myONLY app.

*All the beauty  
of life is made up of  
light and shadow.*

*Leo Tolstoy*

*Home is not a place.  
It's a feeling.*

*Cecelia Ahern*

Made to  
comfort you

## ≡ Climatization

Comfort and energy efficiency in constant balance. We challenge the climatization systems which are installed to achieve the most efficient combination by changing for example between air conditioning and underfloor heating. But above all your comfort is raised by an excellent environment every time you arrive home or by automatically closing the shutters when a room achieves a certain temperature.

**All for a smart comfort.**

Find out more:  
[www.only-smartbuildings.com/climatization/](http://www.only-smartbuildings.com/climatization/)

### About the ONLY CLIMA

The ONLY CLIMA is available for the control of floor and wall radiators, including boiler. Also for the control of fan coil systems (2 or 4 pipes) and split or multi-split type of air conditioning, VRV or VRF. In an ONLY Smart Home system all thermostats might be grouped to share settings.

### Where it is installed

There are 2 versions of the ONLY

CLIMA systems: Wall (standard wall box) and Electric Switchboard (DIN rail mounting standard).

### How to set it up

Directly on the wall ONLY CLICK, ONLY TOUCH, ONLY WAVE or OLED display panels and by using myONLY app.

# Crafted to protect you

*We all need somewhere where we feel safe.*

*Emma Thompson*

## Safety

Customising absence or night modes or specific safety scenarios make it possible to act preventively on your safety. In order to keep you safe and by interacting with light system, shutters open and lights turn on in case of fire detection.

Your home always vigilant.

Find out more:  
[www.only-smartbuildings.com/safety/](http://www.only-smartbuildings.com/safety/)

### About ONLY SAFETY:

ONLY SAFETY is made of a security control panel and ONLY wall keypads with or without OLED display. It detects intrusion, water or gas leakage and fire.

Together with the ONLY Smart Home systems it allows the automatic activation of smart events when a hazard situation occurs improving safety: opens shades, blackouts, etc., through open/close modules; it turns on lights during a night hazard. The communication SAFETY bus is supported by batteries allowing

the total functioning even during a power fail. The SAFETY panels are dedicated to that function and some of its buttons might be used for automation purposes.

### Where it is installed

The security control panel has its own wall mounting box and its security keypads are suitable for standard in-wall box installation.

### How to set it up

Directly on the dedicated security keypads or by using myONLY app.
